Yelabuga, Russian Federation*

The present stage of development of humanity has incredibly fast speed that certainly affects and development of youth. The modern word is “the developing technologies” today. These technologies are applied in kindergartens, schools, by production of toys, computer programs for children. However together with development in the child of future adult member of society, adults sometimes forget about education of the principles of morals and moral, respect for the law. It is necessary to pay attention to that fact that in education of such great people as A.S. Pushkin, L.D. Landau, V. I. Lenin, Yu.A. Gagarin, become history, both our country, and the world in general did not participate the developing games, toys the memories, and a lexicon allowing to improve both. Certainly, it is necessary to mention that children is the main defining capacity of any country. These are future scientists and technicians promoting increase of capacity of Russia on the world scene, the representatives of various branches of the power protecting and observing the principles of the right, eventually, it is citizens of the country, being the carrier of the sovereignty and the only source of the power in the Russian Federation. Paying attention to a problem of investigation of the crimes committed by minors it should be noted that proceeding from various features of psychological, intellectual, physical development of each minor, the legislator provides a number of features of application concerning minor measures of procedural character, features of commission of separate investigative actions follow from here. Results of the conducted statistical research on the reasons of commission of offenses among minors are presented in article. The author gives a high positive assessment to the Russian President’s initiative in improvement of public policy in the field of physical culture and sport, creation of the effective system of physical training aimed at human development and strengthening of health of the population. In article an attempt of the analysis of a condition of crime in the youth environment is made, recommendations of prevention of crimes are offered.

Key words: criminal procedure, family, motherhood, childhood, crime, prevention, investigation, minors.
